

# Learning from $A^*$ by applying a Convolutional Neural Network

Saniea Akhtar, Hendrik Vloet

December 17, 2017

## 1 Introduction

### 1.1 Short Recap of $A^*$

$A^*$  is a informed search method that combines the best of a greedy search with the uniform-cost search

Tasks This section will be divided into a part where we consider the tasks given by the exercise sheet and one part considering additional experimental stuff we played around with.

## 2 Default Task

### 2.1
